Kasey L. Labelle, CPWA

UX & Design Engineering Leadership · Design Systems · Web Accessibility

PROFESSIONAL EXPERIENCE

Design Architect · iSeatz 01/2025 - Present

- Lead the evolution of a design system that powers a white-label Travel as a Service platform
- Consolidate and systematize >17K fragmented Symbols, Styles, and Variables from Sketch into a three-tier design token system, global component library, and recipe layer in Figma
- Support adoption through consultations, co-creation sessions, office hours, and design reviews

Designer, Developer, Accessibility Consultant · KLL 05/2010 - Present

- Serve individual clients, community groups, small businesses, and global companies, managing projects from concept to completion and assembling fluid teams as needed
- Draw on multidisciplinary skills to create and deliver identity systems, websites, print and digital materials, and accessibility consultations

Manager III, UX Front End Development · Boston Scientific 09/2020 - 06/2024

- Shaped design, technical, and product strategy for the design system, improving design efficiency by 25%, development efficiency by 65%, and delivering $3.7M in annual savings
- Led multidisciplinary teams building and consuming the design system and React component library, serving as manager, lead individual contributor, accessibility specialist, and product owner
- Defined OKRs and KPIs to measure design system impact and accessibility maturity
- Developed strategic plans and business cases to build and grow teams and capabilities
- Hired, developed, and promoted staff, doubling capability in first year as manager
- Earned People Leader Survey score of 99%, outperforming the company average of 81%
- Established a cross-functional program to develop, scale, and sustain a culture of accessibility, increasing Lighthouse accessibility scores by 21% and WebAIM Million ranking by >572K

Senior UX Front End Developer · Epsilon 10/2018 - 09/2020

- Led a team of 3 UX Front End Developers and mentored 7 teams of product developers
- Built the first component library and assisted with implementation in 6 products
- Advocated for a standardized tech stack and led multiple product rebuilds, rearchitecting and refactoring front end code to improve the UX, UI, accessibility, and maintainability
- Reduced external styles from 25,000+ lines to 2,400 lines in a legacy product
- Established code standards and hiring practices to elevate organizational knowledge

Senior Software Engineer · Vistaprint 04/2014 - 09/2018

- Developed highly configurable pages and components used on 20+ localized websites
- Built a micro frontend using React and Sass to enable rapid UI experimentation
- Utilized and contributed to the UI Library

PROFESSIONAL EXPERIENCE, CONTINUED

Graphic Designer · JLL 04/2012 - 03/2014

- Designed and developed logos, brochure systems, websites, large-format and environmental signage, corporate reports, and advertisements

Graphic and Web Designer · Raskin Resources 12/2008 - 09/2010

- Spearheaded identity system redesign, including logo, website, and print and digital materials
